# Yuan-Jen Lin

Postdoctoral Associate

Department of Atmospheric and Oceanic Sciences, University of Colorado Boulder

Email: [Yuan-Jen.Lin@colorado.edu](mailto:Yuan-Jen.Lin@colorado.edu) | Website: <https://yuanjenlin.github.io/>

## EDUCATION

---

<b>National Taiwan University</b>	Taipei, Taiwan
Ph.D. in Atmospheric Sciences	2016 – 2022
Thesis: “Climate feedback and the ocean: uncertainties and their interaction under global warming”	
Advisor: Yen-Ting Hwang	
<b>National Taiwan University</b>	Taipei, Taiwan
B.S. in Atmospheric Sciences	2012 – 2016

## RESEARCH EXPERIENCE AND EMPLOYMENT

---

<b>Postdoctoral Associate</b>	2024 - present
Department of Atmospheric and Oceanic Sciences, University of Colorado Boulder	
<b>Postdoctoral Research Scientist</b>	2022 - 2024
Center for Climate Systems Research, Columbia University NASA Goddard Institute for Space Studies (GISS)	
<b>Visiting Scholar</b>	2021 – 2022
Atmospheric & Environmental Sciences, SUNY Albany (Host: Brian E. J. Rose)	
<b>Research Assistant</b>	2016 – 2021
Atmospheric Sciences, National Taiwan University (Supervisor: Yen-Ting Hwang)	

## PEER-REVIEWED PUBLICATIONS

---

2023 **Lin, Yuan-Jen**, Brian EJ Rose, and Yen-Ting Hwang. “Mean state AMOC affects AMOC weakening through subsurface warming in the Labrador Sea.” *Journal of Climate* 36, no. 12 (2023): 3895-3915. <https://doi.org/10.1175/JCLI-D-22-0464.1>

2021 **Lin, Yuan-Jen**, Yen-Ting Hwang, Jian Lu, Fukai Liu, and Brian EJ Rose. “The dominant contribution of Southern Ocean heat uptake to time-evolving radiative feedback in CESM.” *Geophysical Research Letters* 48, no. 9 (2021): e2021GL093302. <https://doi.org/10.1029/2021GL093302>

2019 **Lin, Yuan-Jen**, Yen-Ting Hwang, Paulo Ceppi, and Jonathan M. Gregory. “Uncertainty in the evolution of climate feedback traced to the strength of the Atlantic meridional overturning circulation.” *Geophysical Research Letters* 46, no. 21 (2019): 12331-12339. <https://doi.org/10.1029/2019GL083084>

*in review.* **Lin, Yuan-Jen**, Gregory V. Cesana, Cristian Proistosescu, Mark D. Zelinka, and Kyle C. Armour. “The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback.” (in review, *Journal of Climate*)

*in prep.* **Lin, Yuan-Jen** and co-authors. “Intermodel spread of radiative feedback patterns traced to regional surface warming using NASA GISS ModelE3 Green’s Function.”

## PRESENTATIONS

---

- Seminar, Department of Atmospheric Science, Colorado State University Jan 2024  
“The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback”
- NCAR Climate and Global Dynamics Laboratory (CGD) Seminar Jan 2024  
“The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback”
- Atmospheric & Climate Dynamics Seminar, University of Washington Nov 2023  
“The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback”
- SEAS Colloquium in Climate Science (SCiCS), Columbia University Apr 2022  
“Understanding changing ocean circulation and its role in modifying climate sensitivity”
- Lightning Talk at the 15th ECS symposium Feb 2022  
“The dominant contribution of Southern Ocean heat uptake to time-evolving radiative feedback in CESM”
- Climate Seminar, University at Albany (SUNY) Oct 2021  
“The role of ocean in the time-evolving radiative feedbacks”
- CASPO Seminar, Scripps Institution of Oceanography Nov 2020  
“Understanding the role of ocean in modifying time-evolving radiative feedback”

## HONORS AND AWARDS

---

- 2022 Chou Chia Publication Award: Lin et al. (2021) (doi: 10.1029/2021GL093302)
- 2021 Chou Chia Publication Award: Lin et al. (2019) (doi: 10.1029/2019GL083084)
- \*Chou Chia Publication Award is an annual award for climate related publication in Taiwan, in memory of the climate scientist Chou Chia.*
- 2019 Best Presentation Award | Atmospheric Sciences Annual Meeting, Taoyuan, Taiwan.
- 2017 Best Presentation Award | Atmospheric Sciences Annual Meeting, Miaoli, Taiwan.

## GRANT FUNDING

---

- Graduate Student Study Abroad Program, Ministry of Science and Technology, Taiwan 2021-2022  
*The grant supports my one-year research visit at SUNY Albany.*

## SELECTED CONFERENCE PRESENTATIONS

---

- CFMIP/CLIVAR Meeting on Clouds, Circulation and Climate, Chestnut Hill, MA. Jun 2024  
(poster) *Intermodel spread of radiative feedback patterns traced to regional surface warming using NASA GISS ModelE3 Green's Function*
- Workshop on Confronting Earth System Model Trends with Observations, Boulder, CO. Mar 2024  
(oral) *The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback*
- CFMIP-GASS Meeting on Cloud, Precipitation, Circulation & Climate Sensitivity, France. Jul 2023  
(poster) *The relative importance of forced and unforced temperature patterns in driving the time variation of low-cloud feedback*
- AGU Fall Meeting, Chicago, IL. Dec 2022  
(oral) *Mean state AMOC affects AMOC weakening through subsurface warming in the Labrador Sea*

The Pattern Effect Workshop, Boulder, CO. May 2022  
*(poster) The role of ocean in modifying SST pattern formation and time-evolving radiative feedback*

US AMOC Science Team Meeting, Woods Hole, MA. Apr 2022  
*(poster) Mean state AMOC affects AMOC weakening through subsurface warming in the Labrador Sea*

CFMIP Annual Meeting on Clouds, Precipitation, Circulation & Climate Sensitivity, Online. Sep 2021  
*(poster) The role of ocean in the time-evolving radiative feedbacks*

AGU Fall Meeting, Online. Dec 2020  
*(oral) Attributing Radiative Feedback Evolution to Regional Ocean Heat Uptake*

East Asian Workshop on Climate Dynamics, Busan, Korea. May 2019  
*(oral) Uncertainty in the Evolution of Climate Feedback Traced to the Strength of the Atlantic Meridional Overturning Circulation*

CFMIP Annual Meeting on Clouds, Precipitation, Circulation, & Climate Sensitivity, CO. Oct 2018  
*(oral) Uncertainty in the Evolution of Climate Feedback Traced to the Strength of the Atlantic Meridional Overturning Circulation*

Atmospheric Sciences Annual Meeting, Miaoli, Taiwan. Feb 2017  
*(poster) Responses to Greenhouse Gas Forcing and their Influence on Global and Regional Climate Change in CMIP5 GCMs*

## LEADERSHIP AND SERVICE

---

### Peer Review

Geophysical Research Letters  
 Journal of Climate  
 Journal of Advances in Modeling Earth Systems  
 Nature Geoscience  
 Nature Communications  
 Communications Earth & Environment  
 Nature Climate Change

**Executive Committee Member of Climate Seminar**, University at Albany, SUNY. (2021-2022)

**Volunteer Staff**, CFMIP Annual Meeting. (2021)

## TEACHING AND MENTORING EXPERIENCE

---

**Teaching Assistant**, National Taiwan University  
 Climate Science (Spring 2021, Spring 2020, Fall 2018, Fall 2016)  
 An Introductory Survey to Atmospheric Science Research (Spring 2018, Spring 2017)

## SKILL MATRIX

---

**Programming Languages:** Python (proficient), Fortran, Matlab

**Shell Scripting:** Bash

**Version Control:** Git

**GCMs:** Community Earth System Model (CESM), NASA GISS ModelE

**High Performance Computing:** Intel Compiler, PBS, Slurm Workload Manager

**Data Analysis/Visualization:** Python (xarray, numpy, scipy, matplotlib, etc.), Cloud computing (Pangeo), Climate Data Operators (CDO), NetCDF Operators (NCO), NCAR Command Language (NCL), Matlab
